

FATHIMA ZAHARA

Full Stack Developer | B.E. Computer Science & Engineering (2026)
zaharafathima935@gmail.com | 9019883557 | Hassan, Karnataka
fathima-zahara.vercel.app | github.com/zaharaCodes | linkedin.com/in/fathima-zahara525

PROFESSIONAL SUMMARY

Full-Stack Developer and Computer Science Engineering student (2026) with proven experience independently designing, building, and deploying AI-powered web applications, real-time collaborative platforms, and deep learning classification systems. Developed 3 production-grade projects spanning telemedicine infrastructure (React.js, Node.js, PostgreSQL, WebRTC, Socket.io, Docker), real-time agency project management (TypeScript, JWT RBAC, Prisma ORM, node-cron), and CNN-based medicinal plant identification published at an international research conference. Experienced integrating LLM APIs (LLaMA 3.3 70B via Groq), implementing role-based access control, containerizing full-stack applications with Docker, and building offline-first architectures for low-connectivity environments.

EDUCATION

Bachelor of Engineering — Computer Science & Engineering 2022 – 2026
Malnad College of Engineering, Hassan, Karnataka | CGPA: 7.89

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SQL	Auth & Sec: JWT, Firebase Authentication Role-Based Access Control (RBAC)
Frontend: React.js, React Hooks, React Router, Tailwind CSS Responsive UI/UX	AI / ML: LLaMA 3.3 70B (Groq API), TensorFlow, Keras, CNN
Backend: Node.js, Express.js, REST APIs, Socket.io, WebRTC, Flask	DevOps: Docker, Docker Compose, Nginx, Git, GitHub, Vercel, Railway
Databases: PostgreSQL, MongoDB, Prisma ORM, MySQL	Tools: Prisma CLI, VS Code, npm
	Soft Skills: Communication, Leadership, Problem Solving Team Collaboration

WORK EXPERIENCE

Full Stack Developer Intern — Vrishanksoft (OPC) Pvt Ltd Feb 2026 – Present | Hassan, Karnataka

- Developing production full-stack features using React.js, Node.js, and REST APIs within an agile team with structured code reviews, Git branching workflows, and sprint-based delivery.
- Applying professional engineering standards including modular architecture, component reusability, API contract design, and collaborative version control on real client-facing products.

PROJECTS

Flowspace — Real-Time Agency Project Management Dashboard
React 18 · TypeScript · Node.js · PostgreSQL · Socket.io · Prisma ORM · JWT · Docker · Tailwind CSS

- Architected 3-role RBAC (Admin, Project Manager, Developer) enforced at Express middleware with JWT access tokens and HttpOnly refresh cookies; PostgreSQL schema with 7 tables, foreign keys, and Prisma ORM indexes.
- Built Socket.io WebSocket server with role-filtered real-time emit, live presence counter, DB-backed missed-event catchup, and node-cron background job to auto-flag overdue tasks every hour.
- Delivered full PM workflow — Kanban board, list-view toggle, instant task search, shareable filter URLs, progress rings, due-date warnings, skeleton loaders, toast notifications — containerized with Docker Compose.

HealthBridge — AI-Powered Telemedicine Platform
React.js · Node.js · PostgreSQL · Prisma ORM · Firebase Auth · Socket.io · WebRTC · Docker · Nginx · Groq API

- Built 30+ component React frontend with Node.js/Express REST API, PostgreSQL via Prisma ORM, and Firebase Auth — first-login role selection (Doctor/Patient) with fully protected route architecture.
- Integrated LLaMA 3.3 70B (Groq API) for AI symptom triage (Emergency/See Doctor/Monitor) and lab report image analysis; real-time chat via Socket.io and peer-to-peer video consultations via WebRTC.
- Implemented offline-first data layer with localStorage caching for 2G rural India; delivered e-prescriptions, health records, medicine reminders, vitals tracker with custom SVG charts, Docker + Nginx deployment.

Medicinal Plant Detection — Deep Learning Classification System
Python · TensorFlow · Keras · CNN · Flask · REST API · Image Processing

- Designed, trained, and evaluated a CNN model (TensorFlow/Keras) for automated medicinal plant species identification from images — research accepted and presented at iCREATE 2025 International Conference on Research, Engineering, and Advanced Technologies.
- Built Flask web application with REST API enabling real-time image upload, end-to-end model inference pipeline, and classification results with confidence scores.

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL — Soft Skill Development, Ethical Hacking, Computer Vision | Infosys Springboard — Programming for Data Science with R | Coursera — Prompt Engineering for ChatGPT
- Published Research: "Automated Medicinal Plant Identification Using Deep CNN" — iCREATE 2025: International Conference on Research, Engineering, and Advanced Technologies in Computing & Management.
